

We were first awarded The Remanufacturer of the Year Award in 2019, having been recognised as one of the best global remanufacturers of toner cartridges. The award shows dedication and continued commitment to providing only the 'best in class' remanufactured products for our Partners.

In 2020 we were crowned Remanufacturer of the Year for the second year in a row, beating off competition from around the world, including companies from Europe, Asia and the United States. Our relentless pursuit of providing the highest quality remanufactured toners in the world has once again been recognised and rewarded.

2020 proved to be a fantastic year for us, taking home not only the Remanufacturer of the Year Award, but also the Collector of the Year award on behalf of our fantastic recycling service; The Greener Side - one of the UK's largest toner cartridge collection schemes. Again, this award shows that our commitment to improving our industries green credentials went far beyond most others within the industry.
